Boneless Trim

We have processed deer for many years and always try to make the best product we can. Please keep your trim clean and cold. Please do Not soak your trim out after processing. It will increase the bacterial growth and the meat will spoil faster.

We batch all meat together to process. We inspect the trim after it comes in and any that does not meet our quality is either discarded or sent back to the owner.

Please bring in your trim in food grade bags or containers. Starting this year, we will not take deer in garbage bags or shopping bags.

We have food grade bags for sale here.
